Receipt of Plymouth Engineered Shapes Material Specification

Plymouth Engineered Shapes Specification number **HV-3**, for Titanium Rounds for Extrusion Stock has been revised. The new release is identified as (SPEC-00010) **HV-3, Rev. 15**. Below is a listing of the changes incorporated into this revision:

- 3.0 Combined 3.0 / 11.0 Surface Finish / Condition. And removed “S 13 MICRO FINISH COMPARATOR” from requirements leaving min / max Ra values.
- 4.1 Added clarification for Element and OE calculation reporting.
- Moved 4.2, 4.3, and 4.4 to section 14.0 “Reports”
- 5.0 – New Section, Added Melt Practice requirements;
- 6.0 (was 5.0) – Revised UT requirements to 5” ~ 9 ½” dia. Only
- 12.1 – added engraving as an option
- 14.0 – Added section for Minimum Test Report requirements.

_____ (“Supplier”) hereby acknowledges receipt of the Plymouth Engineered Shapes Specification number **HV-3, Revision 15**, released **May 23, 2024**, which provides the requirements for Titanium Rounds for Extrusion stock supplied to Plymouth Engineered Shapes.

Supplier accepts the requirements included in the Specification (with any agreed upon exceptions as shown in an attachment at the end of this document) and agrees and understands that stated requirements are incorporated and made a part of all purchase orders for the supply of applicable material from Supplier to Plymouth Engineered Shapes.
